

Windows 11 Repair Toolkit

Practical computer help written for everyday users

Safety: Back up important data when possible. Power off and unplug equipment before opening a computer. Stop if you see liquid damage, smoke, burning smell, or a failing drive.

Repair sequence

- Restart and disconnect unnecessary accessories.
- Check Windows Update history.
- Run SFC, then DISM.
- Use Safe Mode to remove recent drivers or software.
- Use System Restore.
- Use an in-place repair install before a full reset when Windows still boots.

Commands

- `sfc /scannow`
- `DISM /Online /Cleanup-Image /RestoreHealth`
- `chkdsk /scan`

Backups

- Copy documents, photos, browser exports, and application license information before reset or reinstall.

This guide is educational and cannot identify every hardware or data-loss risk remotely. Use the exact manual for your device or motherboard when firmware settings differ.
